

ABSTRACT OF THE DISCLOSURE

A mode selecting dial and an indicator are provided on a digital camera body. Plural symbols corresponding to each mode are printed on the mode selecting dial. When one of the plural symbols is set at the indicator, the digital camera is set to the mode corresponding to the symbol. The indicator has an oblong cover, and a green LED and a red LED, which were formed inside of the oblong cover. The green LED and the red LED emit light simultaneously or by choice according to the condition of the digital camera. The condition of the digital camera can be known by light emission of the indicator.
